## October's Cases of Interest

### **Preston County Accident Leads to Concussion**

We received a call from our client after he was struck at an intersection on Berts Creek Hill in Preston County. The vehicle that struck our client took a wide turn before slamming into our client's stopped car.

After the accident our client traveled by private car to Preston Memorial Hospital where he received treatment for his injuries. He was given a series of X-rays and multiple CT Scans before he was diagnosed with whiplash and a concussion.

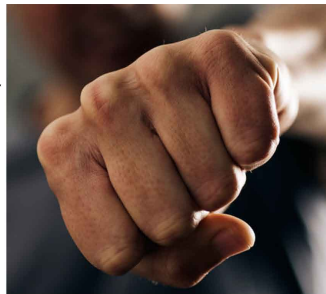

Unfortunately for our client, his injuries will require extensive treatment, including physical therapy and follow up treatment for the brain injury.

### **Assault at Workplace Leads to Stitches and a Mess**

Our client was assaulted at his place of employment by a co-worker that had been known to be very aggressive towards everyone, including customers.

Unfortunately for our client, he became the target after he objected to the removal of his equipment by the co-worker. After being attacked, our client and the assailant had to be separated by a third party.

The end result was a trip to the ER by ambulance for our client and potential assault charges for his co-worker. As we continue to investigate the incident, we will advise our client on how to proceed with his claim.

"The greatest compliment we can receive is the referral of your family and friends."

### **Driver Runs Red Light and Strikes Couple**

Our clients had just begun to travel through an intersection after the light had turned green, when another driver came barreling through their red light. Our client did not have enough time to stop completely, and unfortunately, side-wiped the other vehicle.

With a police car in line behind our clients, they received immediate assistance, but did not get immediate medical care.

Upon returning home, both clients involved in the accident went to their primary care physician where they were diagnosed with numerous sprains. The driver (our client) was diagnosed with a concussion and a bruised rib.

With the accident on film due to a local USPS surveillance camera, it should not be difficult to place full liability on the inattentive driver that struck our clients. However, we have still begun building a case to ensure that nothing is taken for granted and our client's receive fair treatment.
